Reasons for Allowance

1. The following is an Examiner's statement of reasons for allowance:

The invention as claimed distinguishes over the prior art through the provision for the decoupling of business logic and presentation definitions utilizing a user interface controller serving to determine user input, user requests, and appropriate business logic module(s) serving to route user input and request(s) to suitable process module(s) invoked by the process module associated with the user request, in combination with provision for the process module having various states (i.e., logic defining the appropriate business processes) and appropriate logical view identifiers for each and every state, operating together to provide a plurality of request and performance states and associated logical view definitions compatible with the interface of the user computer terminal, such that business logic of a system is suitably encapsulated in a workflow object which provides the generic definition of user presentation of information over a communication channel in accordance with the proper determined operational state of the process module. These features are persuasively argued by Applicant in the Response received on 8/23/2004, inter alia, in Sections 2 through 5 at Pages 13 through 15, interpreted in light of the supporting specification, inter alia, at Page 12, Lines 1-15, and Page 14, Line 8 through Page 18, Line 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
